

## Computer Science Department at California State University

CPSC 332 Project using University Database

### Professor

- Give the social security number of a professor, list the titles, classrooms, meeting days and time of his/her classes.
- Give a course number and a section number, count how many students get each distinct grade, i.e. 'A', 'A-', 'B+', 'B', 'B-', etc.

### Student

- Give a course number list the section of the course, including the classrooms, the meeting days and time, and the number of students enrolled in each section.
- Given the campus wide ID of a student, list all courses the student took and the grades.
